Measuring Success by Customer Satisfaction

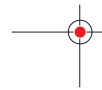

walk-behind edger trowel

▶▶ Walk-behind EDGER TROWEL

This highly versatile concrete power trowel was designed for floating around edges and columns and running up against the walls of a floor slab. The free rotating ring with rubber protection, allows this to happen with no damage to machine or surface. The pan and blades are situated directly under the guard ring in order to effectively finish close up to the wall. The BT424 Edger is an essential finishing machine for any contractor, effectively taking the hand and knee work out of finishing edges, while saving valuable time. This unit comes with a folding handle as standard.

Features:

- body contoured handle bar for control & safety
- dual stop controls – deadman & centrifugal
- chromed handle for easy cleaning
- precision engineered gearbox for trouble free long life.
- lifting hook fitted standard
- folding handle as standard

BT424 Edger Trowel
Incorporating folding mechanism as standard.
