Measuring Success by Customer Satisfaction

compaction equipment

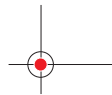

Ian Dickie VPC90ID Vibrating Plate Compactor

The VPC90ID Plate Compactors' low centre of gravity gives it excellent stability and easy handling capabilities. Designed to work in confined areas, the VPC90ID compacts close up to columns, walls and kerbs. Trenches, patchwork on roads, pool surrounds and foundation fills are easily and effectively compacted. Vibration eliminates the friction between soil particles and facilitates settling, at the same time the mass of the VPC90ID assists in compressing the soil into its most compact form. Heavy duty shock mounts insulate the handle and engine from vibrations. A centrally located lifting bar, transport wheels and folding handle are standard on the VPC90ID

Features:

- Operates easily around corners and close up to pillars
- Lifting bar and wheels for easy transport
- Robust, well designed and easy to use
- Folding handle for easy storage
- Throttle control

VPC90ID

Specifications:

Model	VPC90ID
Dimensions	L x W x H mm 540 x 440 x 600 <i>to lifting point</i>
Weight	88.5 kg
Power	3.6 Kw - Honda GX160 Petrol
Speed	38 cm/s
Frequency	4200 VPM
Centrifugal Force	15 Kn
Compaction Depth	300 mm on sand
