Bitumen

ID 10 M Manual Cold Bitumen Sprayer

The ID 10 M can be used for both open areas and for patch work.

The hand operated pump is double acting with ball valves and an air chamber is incorporated to ensure an even and balanced discharge.

The flow is regulated by the stroke. It is of a special construction to handle cold bituminous emulsions and can be easily dismantled for maintenance.

The strainer is positioned to keep the pump fully primed when the operation is intermittent. Always ensure to flush the pump is being left to stand for any length of time. The unit comes on a robust steel chassis with 4 x semi-solid rubber tyred wheels and is suitable for a 210lt drum.

It comes complete with a spray lance with 3m of hose, control valve and 2 X 65° nozzles and a suction probe and hose.

ID 10 HB Hot Bitumen Emulsion Sprayer

Robustly constructed having the following additional features to the Flexian Model ID 10 Cold Bitumen Emulsion Sprayer:

- Ideally sized burner ring
- Full turntable steering incorporating towbar and handle-for easy on site manoeuvrability
- Gas regulator
- Air control valve
- Heat deflector shield
- Gas bottle carrying bracket

ID 10 HD Mobile Drum Heater and Transporter

For pre-heating bitumen emulsion drums Will raise temperature by 15-20° C in the same time it takes to spray out a 210 litre drum The ideal complement to the Flexian Model ID 10 Cold Bitumen emulsion Sprayer for increased production Drum Lifter For easy and safe handling of hot and heavy bitumen emulsion drums.

Features & Benefits

- **High production - many times the daily output of hand sprayers**

- **Sprays cold emulsion with ease**
- **High efficiency cuts labour costs**
- **Light, manoeuvrable, compact**
- **Eliminates 'splotching'**
- **Far greater economy through more even distribution**
- **Gives smooth, even spray**
- **Easily transportable**
- **Robust construction takes rough handling**
- **No operator fatigue**
- **Unique Bypass System**

Specifications

Engine 3,7 kW air-cooled recoil start petrol engine with 6:1 reduction gear.
Output speed governed to approximately 500 r.p.m.

Filter Washable stainless steel mesh filter element.

Pump Gear type pump, direct drive from output shaft of engine reduction gear through a flexible coupling. Output when spraying bitumen emulsion is approximately 18lt per minute.

Lance 5m oil-resistant delivery hose fitted to 2m lance including handle grip, shut-off valve and 2 only 65° flat spray adjustable nozzles.

Chassis Of all steel robust design on four 350mm x 100mm semisolid rubber tyred wheels and incorporating handle bar, splash guard, drum and lance carrying brackets.

When operating near kerbs or other structures which need to be kept clean, the built-in bypass system allows the spray to be instantly cut off or reduced by recycling all or part of the liquid delivered by the pump back to the inlet side of the pump.

A brand of the Unipart Group , Dorman is a leading light in road and rail with extensive product ranges available in more than 30 countries across five continents. Our team of mechanical and electronic engineers has built up an unrivalled knowledge of optical lens design and LED technology.

Every Dorman product is manufactured and conforms to British Standards Institute (BSI) and is ISO 9001:2000 registered.

Features & Benefits

- **Highly energy efficient:** require less power
- **More economical:** they have a longer life (20,000 to 100,000 hours) and are more predictable, as they gradually lose intensity over time
- **More reliable and rugged:** they are a rugged solid state construction meaning they are resistant to thermal shocks and vibration
- **Better safety and security:** no glass to break, no hot filament
